

# ANCHOR BRONZE

*& Metals, Inc.*

Anchor Bronze & Metals, Inc. supplies OEM and repair companies with Continuous Cast Bronze & Wrought Copper Alloys for numerous hydraulic and pneumatic applications such as:

- Cylinder Rod Bushings
- Clevis Bearings
- Hydraulic Gear Pump Wear Plates
- Piston Pump Cylinder Liners
- Piston Pump Cylinder Heads
- Piston Rings
- Valve Bodies
- Fittings
- Bushings
- Alloys for fusion bonding steel

**WE INVENTORY OVER 450 SIZES IN BRONZE TUBING, SOLID ROUNDS AND RECTANGLES. ALL SIZES ARE CUT TO YOUR EXACT LENGTH REQUIREMENT.**

- ✚ **Continuous Cast Bearing Bronze** (C93200/SAE 660) and aluminum bronze (C95400-C95500) are available for rod bushings. These materials are stocked in over 350 sizes in tube, solids rounds, rectangles and squares.
- ✚ **Manganese Bronze** (C67300) and fusion-bonded tin bronze (C93700) are available for piston pump cylinder liners and wear surfaces.
- ✚ **For Cylinder Heads, Valve Bodies & Fittings**, high strength bronzes are available, such as C94700 HT, C95500 and C92900. While having the strength and hardness of steel, these alloys are excellent bearing materials.
- ✚ **Continuous Cast Ductile Iron and Grey Iron** is available in solid diameters, tubes, rectangles and squares to fit a variety of hydraulic & pneumatic applications.
